Paving a better way

At FriloTech, sustainability is central to our mission, driving us to integrate eco-friendly practices into into our operations.

For instance, the outer boxes and cool packs in this folder are made from recycled cardboard, and our EPS partners have started producing boxes from recycled materials too.

This brochure presents cold-chain solutions designed to maintain stable, specified temperatures during transit. All TCP Medicine boxes showcased are pre-qualified, having undergone rigorous in-house testing for flawless performance and durability.

Every TCP box featured is a permanent, in-stock product at FriloTech.

Did you know:

- ✓ Recycled cardboard is eco-friendly and reduces thaw risk by absorbing moisture better than new cardboard.
- ✓ PCM and cool packs are produced with sustainable raw materials, lowering the carbon footprint.
- ✓ Contrary to popular belief, EPS can actually be recycled and re-used, if handled properly.
