

System solutions / 96 hours at 2–8 °C

Perfectly tempered for four days – pre-qualified, secure and always available from stock

The new system solution for temperature-controlled transportation from Storopack keeps the temperature in the shipping unit between 2 and 8°C for approximately 96 hours, in accordance with the temperature profiles indicated below. This makes the protective packaging suitable for international transportation and particularly for products in the pharmaceutical and biotechnology industries. The system solutions are available from stock and are provided with all necessary components, including insulation boxes, cooling agents, shipping cartons, inner cartons, packing instructions and qualification reports.

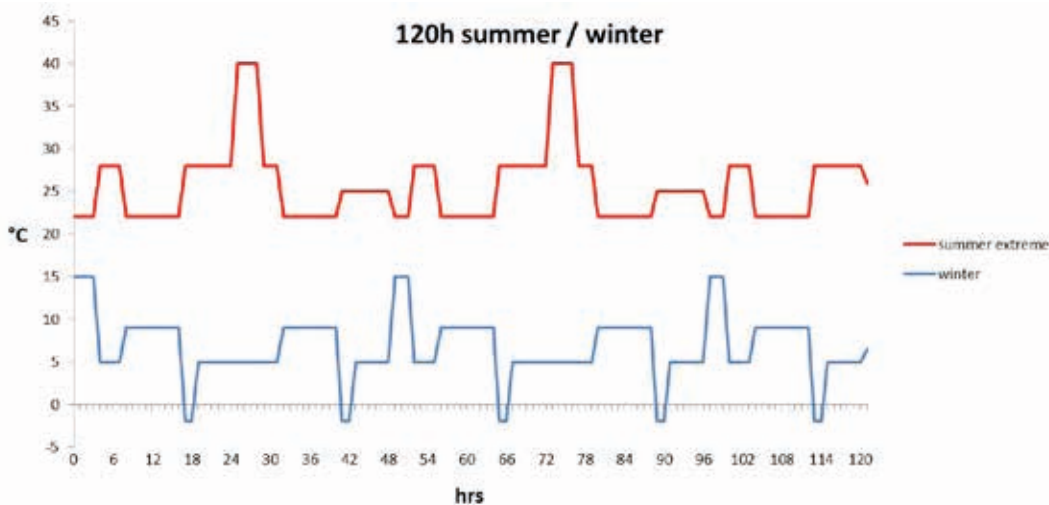

Overview of the four system solutions

System box	Holding time	External dimensions in mm	Effective dimensions in mm	Effective volume in l	Empty weight incl. cooling agents
System box 5 l	83 hrs	434 × 418 × 440	170 × 170 × 161	5	10.8 kg
System box 10 l	96 hrs	484 × 467 × 492	219 × 219 × 212	10	16.5 kg
System box 18 l	98 hrs	544 × 527 × 552	268 × 268 × 252	18	24.4 kg
System box 37 l	114 hrs	614 × 597 × 622	338 × 338 × 323	37	36.4 kg

Temperature simulation in climatic chamber

Parameters:

- Ambient temperature: based on AFNOR profile NF S99-700 with an average temperature of 26 °C in summer and 7° C in winter scenario
- Cooling agent in the form of PCM and water batteries
- Empty packing space (worst-case scenario) to be on the safe side

Storopack – Temperature-Controlled Packaging

Wherever your products are needed in the world, we will make sure that they are well protected during transportation. After all, you've put a lot into this.

Place your trust in the protective packaging solutions from Storopack. We work with you to develop solutions tailored to your individual needs. Learn more about Temperature-Controlled Packaging from Storopack at www.storopack.com.
